srinathsr71@gmail.com

Hsr layout, Bangalore

Professional Summary:

- SDET / QA Engineer with 3.5+ years of experience in Manual, API, and Automation testing across Salesforce Service Cloud, Banking, and AI applications. Hands-on expertise in Selenium WebDriver, Java, Rest Assured, Appium, TestNG, and BDD Cucumber to design scalable test frameworks, improve test coverage, and integrate CI/CD pipelines (Jenkins, Git) for high-quality release readiness.

Technical Skills:-

- Comprehensive Web and Mobile Application Testing
- Salesforce Service Console and AI Models Validation Testing
- **Automation Frameworks:** Selenium WebDriver, Java, Python, Playwright (JS), Appium (Android and iOS Mobile), TestNG, BDD Cucumber, Page Object Model (POM).
- **API & Database Testing:** Rest Assured, Postman, RESTful Endpoint Validation, JSON Path, Microservices Testing, MySQL, SQL Queries, SOQL Queries.
- **Crash & Log Analysis:** Android studio, ADB, Logcat, Charles Proxy, Xcode, Log4j, Extent/Spark Reports, Apache POI, Bugasura, JIRA, Agile/Scrum.
- **DevOps & Cloud Tools:** Jenkins CI/CD Pipelines, Git, Docker, Maven, AWS (EC2, VPC), Browser Stack, IntelliJ IDEA, Eclipse.

Work Experience:-

Moolya Software Testing Private Limited | Feb 2023-Present

Project Name:-Keysight Service Cloud AI Applications

Roles & Responsibilities:-

- Executed **functional, regression, and backend testing** in Salesforce Service Cloud to validate case creation, milestone tracking, and business rule assignments.
- Validated dynamic **case routing to specific queues** based on regional parameters, language criteria, and **product-family mapping rules**.
- Verified **milestone creation, updates, and transitions** based on case status changes, ensuring seamless case distribution via **Omni-Channel routing**.
- Validated **Coveo integration** for accurate product and product-family search indexing between Salesforce backend and UI applications.
- Conducted backend data validation and executed **SOQL queries** to verify **AI prediction outputs (Nuro7 model)**, confidence scores, and automated field updates.
- Tested integration flows between Salesforce backends and external AI services to ensure end-to-end data consistency across systems.

Project Name:-Core Banking System (CBS) & Digital Banking Application

Roles & Responsibilities:-

- Executed end-to-end **functional, regression, and microservices API testing** for customer onboarding modules (ABN, KYC, KYB), validating individual/business flows and 3rd-party identity integrations.
- Performed API testing and schema validation using **Postman and Rest Assured** for microservices (**Stripe, Credit Bureaus, Payment Gateways**), verifying status codes and payload integrity.
- Tested core lending workflows and payment processing (**instant, scheduled, and Stripe QR payment links**), verifying interest calculation algorithms, repayment schedules, and credit scoring integrations (**Equifax**).
- Captured and analyzed mobile logs using **ADB and Charles Proxy** to isolate microservice failures, network latency, and transaction drop-offs.

Project Name:--Koovers Web and Mobile Applications

Roles & Responsibilities:-

- Designed, developed, and maintained scalable UI automation frameworks using **Selenium WebDriver, Java, TestNG**, and **BDD Cucumber**.
- Automated mobile testing on Android platforms using **Appium**, validating critical end-to-end user journeys and regression scenarios.
- Managed test datasets using **JSON and Apache POI (Excel)** for data-driven testing, expanding edge-case test coverage.
- Integrated automated execution suites into **Jenkins CI/CD pipelines**, generating **Extent Reports** for clear execution visibility.

Project Name:-Veera(Mobile Browser) For Android

Roles & Responsibilities:-

- Developed and executed manual test cases covering **functional, regression, and UAT scenarios** for Android mobile browser builds.
- Performed API testing on RESTful endpoints using **Postman**, validating response accuracy, status codes, and service integrations.
- Logged, tracked, and managed defects using **JIRA and Bugasura**, capturing **ADB logs** and network traffic for rapid developer root-cause analysis.

Independent QA Automation Projects & Upskilling | June 2021-Nov2021

QA Automation Engineer (Freelancer) | Nov 2021 – Dec 2022

Roles & Responsibilities:-

- Developed end-to-end test suites and executed **functional, regression, and usability testing** across web and mobile application prototypes.
- Built modular automation frameworks from scratch using **Java, Selenium WebDriver, TestNG**, and **Page Object Model (POM)** design patterns.
- Conducted API testing using **Postman and Rest Assured**, validating query parameters, authentication headers, and JSON response schemas.
- Documented detailed test cases, traceability matrices (**RTM**), and bug reports in **JIRA** to ensure complete test coverage.

Impact & Key Achievements

- **AI Productivity & Time Savings:** Built an internal Proof-of-Concept (POC) using **Microsoft Copilot Studio** to automate Salesforce SOQL query generation using natural language; optimized reference data formatting (.docx to Markdown) to **reduce token consumption by 67%** and **save ~4 hours of manual query-building effort daily**.
- **Business Logic & Edge Cases:** Analyzed and resolved critical stock management edge cases, preventing users from taking more stock than allowed and ensuring accurate, error-free application behavior.
- **Automation Efficiency:** Reduced manual regression execution time by **40%** at Moolya through automated test suite execution and log analysis integration.
- **Defect Prevention:** Improved defect detection rate by **20%** by introducing automated log analysis and structured API assertions.
- **AI & Data Integrity:** Identified and resolved critical product-family mapping inconsistencies in Salesforce Service Cloud, preventing **AI prediction mismatches** in live environments.

Education:-

MITs,Madanapalle.
2015
B.Tech(CSE)

Languages:-

- Telugu
- English
- Kannada

Domains Worked:-

- Salesforce CRM, AI & Copilot Agents
 - CBS (Core Banking System) & FinTech
 - E-Commerce & Mobile Applications
-
